TWO - LETTER REGION ABBREVIATIONS & PIKE CODE INFORMATION

In order to make this DIRECTORY more useful, an alphabetical list of all the members has been added to the new format. This will enable you to locate any member, whether you know only his name or his state of residence. The following chart gives the abbreviation used for each region on pages 4 and 5.

Allegheny Region	AL	Northwest Region	NW
Central European Region	CE	Plains Region	PL
Great Lakes Region	GL	Southeast Region	SE
Hudson Bay Region	HB	West Coast Region	WC
Mid Continent Region	MC	Yankee Region	YK

To maintain a semblance of uniformity, the basic pattern for the pike coding as used last year also appears in this DIRECTORY. It appears below.

This means that John is in his third year with the TAMR (hence the "3" after his name) and is an associate member. Were there no (A) after his years with the TAMR, John would be presumed to be a regular member. John models in HO scale, has between 151 and 200 feet of track, models in the time period between 1950 to the present (1969), trades passes, likes steam, diesel, freight, and passenger operations, welcomes visitors unconditionally, and belongs to the NMRA (National Model Railroad Association, Inc.).
